

# Because life is in the balance.

Your independent lifestyle is worth protecting. MyNotifi® is a one-of-a-kind medical alert wristband that alerts family and friends automatically via an easy-to-use smartphone app when a fall is detected.

**NO MONTHLY FEES.**

my**notifi**®

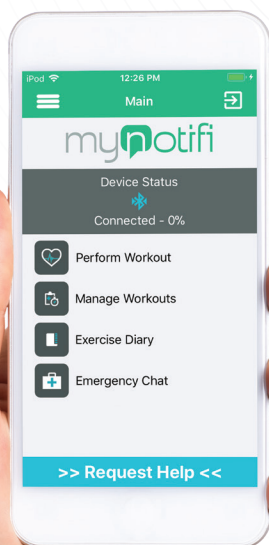

Stay fit. Stay safe. Stay notified.

# A better sensor of security.

MyNotifi is an easy-to-use, app-driven device. In the event of a fall, it uses Bluetooth® technology to notify your family and friends via their smartphones. Best of all, there's no need to push a button for help. Your loved ones will know there's a problem even if you are unconscious or unable to move.

## Features:

- Magnetic band
- Easy to adjust
- Secure, comfortable fit
- Waterproof
- Available for iOS® and Android™ devices

## Fall detection you can trust.

Only MyNotifi has you truly covered with 24/7 notifications to family, friends and response centers.

**Accurate:** Proven accuracy in extensive fall detection testing.

**Immediate:** Notifies everyone in your customizable contact list the moment a fall is detected.

**Precise:** Senses and reports a full range of accidents from stumbles to serious falls. Should a fall occur, the MyNotifi app enables your exact location to be sent with the notification.

# Know the risks.

It's only natural to feel a little unsteady stepping into the shower or uneasy walking down stairs. Falling is the leading cause of unintentional-injury deaths for people over the age of 65.

**For those 65+, falling once doubles the chance of falling again.**

**Did you know that remaining on the floor for more than two hours after a fall increases the risk of dehydration, pressure ulcers, muscle breakdown, hypothermia and pneumonia?**

## **Other risk factors that can increase the odds of a fall:**

- Lower-body weakness
- Gait and balance problems
- Poor vision
- Problems with feet and/or shoes
- Low blood pressure
- Chronic conditions
- Fear of falling
- Medications
- Environment or home hazards

# Keep your freedom.

Just because you can't move like you once did doesn't mean you have to slow down. MyNotifi lets your loved ones know you're safe while you go on living your life without the restrictions that come with other medical alert systems. **We designed MyNotifi to be a life-saving device — not a life-changing one.**

# Expand your safety net.

MyNotifi takes a comprehensive approach to balancing your sense of freedom and their peace of mind.

## Stay fit.

The MyNotifi app comes preloaded with several exercises designed to build strength in your arms, legs and core, which promotes balance and stability.

- Wear MyNotifi on the wrist or ankle for exercises
- Optimize your range of motion
- Track progress over time
- Share fitness and physical therapy progress with your doctor

## Stay safe.

The safety features built into MyNotifi go beyond fall detection.

- Uses your smartphone to share your exact location in an emergency
- Tapping feature allows you to request help in ANY emergency situation by tapping the wristband with your hand or against an object.

## Stay notified.

MyNotifi automatically sends important alerts regarding you and your device so everyone stays in the loop.

### Your contacts will receive alerts if:

- A fall occurs
- You are unresponsive after a fall
- No movement has been detected after 2.5 hours
- A request for help has been activated via the tapping feature

### You and your contacts will receive notifications if:

- Bluetooth® connection to your phone is disconnected more than three hours
- Battery life is low
- Important app updates are available to improve your device's functionality

# One smart device. One easy choice.

When it comes to medical alert systems, there really is no comparison. Only MyNotifi offers all of these benefits:

- **NO MONTHLY FEES**
- One-time purchase
- No contracts or paperwork
- No landline required
- No equipment installation or maintenance
- No centralized home system or separate on-the-go devices
- No button to push
- Easy-to-use app
- 24/7 notifications to family, friends and response centers
